JUAN GARZÓN

Frontend developer with experience working with both front-end and back-end technologies, such as: Typescript, React, Javascript and Node, among others. Passionate about creating things through programming and especially providing scalable, attractive and optimal solutions for the user. Adaptive person, able to work autonomously and as a team. Detail-oriented, with good analysis and problem solving capabilities.

EXPERIENCE

Frontend Developer, DASCalendar - Internship
Remote

Jan 2024 - Jun 2024

- Collaborate with the frontend and backend team in the development, integration and maintenance of the application's functionalities.
- Participate pro-actively in the creation of documentation for new application subsystems, such as the "drag and drop" system for the "timeline" section.
- Maintain and refactor code for some of the components on the page to improve the flow of use for the development team.
- Contribute to the mitigation of interface errors.
- Implement some design improvements proposed by the team.

Full Stack Web Developer (Academic), Henry - Training contract
Remote

Dec 2022 - Jan 2023

- Participation in the design and development of a complete application on Animes as part of an agile development team of 4 developers.
- Responsible for the design of the application using Figma and the development of features such as registration, detail, filtering, user panel and subscription by plan.
- Work with the team to ensure proper integration and a smooth user experience.
- Improve desktop application performance by 36%, reducing charging time from 20s to 13s on 3g slow network.
- Collaborate on error and load management in the detail and home sections.
- Learn and implement new technologies such as Typescript, payment gateway with Paypal API, password encryption with bcrypt and third-party login with Auth0.

PROJECTS

Soflink - Project management app (https://soflink.vercel.app/)

Aug 2023 - Present

Collaborative (real-time) application for project management. Organize, add, assign and eliminate project tasks. With emphasis on simple and fast use.

Technologies: Typescript, React, Node, Express, Mongodb, Prisma, Graphql, Apollo, Websocket, HTML, TailwindCSS, Auth0.

HARD SKILLS

- Typescript • React • Javascript • Next • Node • Express • PostgreSQL • Redux
- HTML5 y CSS3 • Tailwind • Git • Figma • Auth0 • Sequelize • Azure Web App Services
- MongoDB • GraphQL

SOFT SKILLS

- Critical thinking • Autonomy • Effective communication • Commitment

EDUCATION
